# Internet Explorer 8 Window

### The Fundamentals

- **A web address** is also called a Uniform Resource Locator (URL) and it is made up of several parts: `http://` This stands for Hypertext Transfer Protocol, the set of rules for exchanging files on the Worldwide Web.

- **Domain name**: The unique name that identifies an Internet site. Domain names have two or more parts separated by dots. For example, `www.customguide.com`. This stands for Hypertext Transfer Protocol, which is short for HTTP. HTTP is the set of rules for exchanging files on the World Wide Web.

### Internet Explorer 8 Quick Reference Card

- **To Open a Web Page**: Click the Address Bar and type the address of the Web page. Or, press `<Ctrl>` + `<L>` and enter the address.
- **To Open a Hyperlink**: Click the hyperlink on the Web page.
- **To Open a Hyperlink in a New Tab**: Press and hold `<Ctrl>` and click the hyperlink on the Web page.
- **To Refresh a Web Page**: Click the Refresh button on the Address Bar, or press `<F5>`.
- **To Stop Downloading a Page**: Click the Stop button on the Address Bar, or press `<Esc>`.
- **To Go Back to a Page**: Click the Back button or press `<Alt>` + `<←>`. Or, click the Recent Pages button and select the page.
- **To Go Forward a Page**: Click the Forward button or press `<Alt>` + `<→>`. Or click the Recent Pages button and select the page.
- **To Print a Web Page**: Click the Print button on the Command Bar, or press `<Ctrl>` + `<P>`.
- **To Print Preview**: Click the Print button list arrow on the Command Bar and select Print Preview from the list.
- **To Search the Web**: Click in the Instant Search box or press `<Ctrl>` + `<E>`. Type your search word or term and press `<Enter>`. Press `<Alt>` + `<Enter>` to view results in a new tab.
- **To Change the Search Box Provider**: Click the list arrow on the right side of the Search box and select a new search provider.
- **To Add a Search Provider**: Click the list arrow on the right side of the Search box and select Find More Providers and follow instructions.
- **To Use AutoComplete in the Address Bar**: Start typing the URL of the page you want to open. A list of previously typed addresses appears below the Address Bar. Use the down arrows or the mouse to select an address from the list and press `<Enter>`.
- **To View the Menu Bar**: Click the Tools button on the Command Bar and select Toolbars → Menu Bar. When the Menu Bar appears, you can issue commands using the menus as with previous versions of Internet Explorer.

### Keystroke Shortcuts

### Tabs

- Tabs allow you to view multiple Web pages in one browser window. Other benefits include the ability to open links in a background tab while reading a page, and saving and opening multiple pages at once. For example, you can have several pages as your home page, with each page open in its own tab.

- **To Open a New Tab:** Press `<Ctrl>` + `<T>`, or click the New Tab button to the right of the most recently opened tab.

- **To Open a Link in a New Tab:** Press and hold the `<Ctrl>` key and click the link you want to open. Or, click the link with the middle mouse button (the mouse wheel).

- **To Open Search Results in a New Tab:** Press `<Alt>` + `<Enter>` from the Address Bar or Search box to open search results in a new tab.

- **To Open Quick Tabs View:** Click the Quick Tabs button or press `<Ctrl>` + `<Q>`.

- **To Close a Tab:** Click the Close button on the tab. Or, press `<Ctrl>` + `<W>`. Or, click a tab with the middle mouse button (the mouse wheel).

- **To Close All Tabs:** Press `<Alt>` + `<F4>`.

- **To Close All Other Tabs:** Press `<Ctrl>` + `<Alt>` + `<F4>`.

- **To Switch Between Tabs:** Click the tab you want to view. Or, press `<Ctrl>` + `<Tab>` to move to the next tab. Press `<Ctrl>` + `<Shift>` + `<Tab>` to move to the previous tab. Or, click the Tab List button and select a tab from the list.

### Command Bar

- **To Go to the Home Page:** The home page(s) appear when Internet Explorer is launched. Click the Home Page button on the Command Bar. Or, press `<Alt>` + `<M>`. If more than one Web site is set as the home page, click the Home Page button list arrow and select a site from the list.

- **To Add or Change the Home Page:** Make sure the Web site you want to use is open in the browser. Click the Home Page button list arrow and select Add or Change Home Page. Select an option from the dialog box and click Yes.

- **To Remove a Home Page:** Click the Home Page button list arrow, select Remove, and select the page you want to remove as home page. Select Remove All to open Internet Explorer to a blank page. Click Yes in the dialog box that appears.

- **To Get Help:** Press `<F1>` to open the Help window, type your question in normal English, and press `<Enter>`.

- **To Zoom in on a Web Page:** Click the Page button on the Command Bar, click Zoom, and select an option from the menu.

- **To Increase Text Size:** Click the Page button on the Command Bar, point to Text Size and select an option from the list.

- **To View Internet Explorer in Full Screen:** Click the Tools button on the Command Bar and select Full Screen. Or, press `<F11>`.

### Accelerators

- New in IE 8, an accelerator allows you to highlight a word or phrase on a Web Page and quickly perform tasks related to that word or phrase.

- **To Use Accelerators:** Highlight a word or phrase—such as a street address or product name—click the blue Accelerator icon that appears, and select the task you want to perform.

### Web Slices

- New in IE 8, a Web Slice lets you keep track of sites that are updated frequently—such as stock quotes and weather reports—via the Favorites Bar.

- **To Subscribe to a Web Slice:** If a Web Slice is available for a Web page, a green Web Slice icon will appear on the Command Bar. Click this icon to subscribe, or press `<Ctrl>` + `<J>`.

- **To View a Web Slice:** When new information is available, the Web Slice will appear highlighted on the Favorites Bar. Click the Web Slice on the Favorites Bar to view its updates.

### Search Tips

The World Wide Web is a vast source of information. Here are a few tips to help find the information you want:

- **Smart Search:** Search results now appear as soon as you start typing in the Search box. Click a result at any time to immediately jump to its source.

- **Visual Suggestions:** Visual previews now appear in the search results menu to aid you in finding the correct search result.

- **Search Terms:** To find lots of information on a topic, enter a single search term, such as Hawaii. Add terms to narrow results, such as vacation Hawaii.

- **Search Phrases:** To find an exact phrase or name, enclose the phrase in quotations, such as "the road less traveled" or "Abraham Lincoln".
